Since it doesn't seem like this will be a long response, Eric and I are sharing one Scribe project. I loaded the initial set of lab results this evening and sent the file back to Eric for him to publish. I added one field to the lab results table – Uncertainty.

Melissa,

Sorry. i was at a wake all day today, so i'm not sure if this has been addressed or not.

I setup a combined subscription which includes project ID# 1461, and 1462.

ID (b) (6)

Password: (b) (6)

I also added both projects to the Region 6 database service and orator.

So then you all would just need to decide who was going to be in charge of subscribing and re-publishing as a new project to get the combined EPA project. At that point i'll make you a new subscription so folks can use that for the straight file download.

And if it has been addressed, then just ignore this email.

I'll be unavailable tomorrow morning, but otherwise let me know if you need anything else.

Good luck,

Joe Schaefer

We got our first lab results in and wanted to get our first combine for the EPA data going. Let me know if you guys need subscription information. It's only the single field and single results projects at this time.

Thanks
Melissa
